

Sub-Sea SERIES

FULLY-FILLED CASE WITH TEMPERATURE COMPENSATION

STANDARD FEATURES

The internal "breathing diaphragm" eliminates the need for an air bubble in the mid-range of the gauge, which can distort readings and look unsightly. The "ICD" is standard on all 2-1/2", 3-1/2" and 4-1/2" Sub-Sea Series gauges.

The "ICD" prevents accuracy shift from changes in internal case pressure caused by fluctuations in ambient temperatures. The ICD also compensates the case for external pressure in Sub-Sea Deep Water Applications. A SPAN exclusive feature.
